TERMS FOR STARTING CENTER IN INDIA

SUBJECT: List of Programs and process of Implementation with our Associates

Dear Br. Hamid

We are a group of professionals who have worked in the highest capacity in different organizations such as Indian Defense, Corporate, Judiciary, Civil Services, Research and Architecture. We have come together with a common purpose of supporting, guiding, coaching and sponsoring capable and competent students aspiring to make their career in different professions.

We run different sponsored programs for different competitive exams, which are either for career or academics. For past five years we have been conducting one year free residential coaching program for students aspiring to make their career in Civil Services. This experience has helped us in analyzing the deficiencies and capabilities of the young students; hence we have decided to start a systematic, step up online coaching program for students from class VIII onwards at a national level. Our first L-1, program was quite successful, with 284 students participating. We are quite enthusiastic with the feedback and seriousness shown by the aspiring students.

For close and better coordination with the students, we have decided to have training centers all over India. The role of the center will be to identify & register the students, provide them with necessary infrastructure, facilities and monitor their performance. Since all the programs are highly sponsored, we charge nominal fees to the students to meet the cost and to be self-sustained. Please note, Knowledge Park Trust, have stopped taking "ZAKAT", and have decided to operate the trust on the Bases of "SELF-FUNDING". This was possible only due to the support of our associates at PAN India. Lists of programs are detailed below for information.
